POLAND TO MANUFACTURE PENICILLIN;
PHARMACEUTICAL OUTPUT INCREASED

FACTORY TO MAKE YELLOW PENICILLIN -- Trybuna Ludu, No 170, 23 Jun 49

A Polish Press Agency representative was notified by the technical director of the Association of the Pharmaceutical Enterprises that roland will start to manufacture penicillin on 22 July 1949. However, only yellow penicillin will be manufactured, since special purification equipment is needed for the manufacture of white penicillin. The special equipment, manufactured in the US, can be exported only on a special export license. The US authorities will not permit this equipment to be exported to Poland.

UNRRA was to have supplied Poland with complete equipment necessary for the manufacture of penicillin, together with instructions for manufacturing it; also, the necessary chemicals and penicillin mold. However, all of the equipment was not received, not even the penicillin mold. The penicillin mold which Poland now has on hand has been received from other than US sources.

WORKERS PLEDGE ADDITIONAL PHARMACEUTICAL OUTPUT -- Trybuna Ludu, No 178, 1 Jul 49

In honor of the approaching anniversary of the publication of the Manifest of the Polish Committee of National Liberation, the workers of the State Plant of the United Pharmaceutical Enterprises in Warsaw pledged an additional production, valued at 42,049,274 zlotys, by 22 July.
